

Darren Keil, P.E. - Principal

- Principal-in-charge of the electrical engineering and technology departments plus quality control.
- Responsible for electrical department engineering procedures and project management functions.
- Leads alternative energy facility design with special focus in solar array fields.
- Project focus: commercial, religious, K-12 and higher education, power distribution.

Doug Hohman, P.E., LEED AP - Principal

- Principal-in-charge of mechanical department, overseeing mechanical documents and quality control.
- Responsible for mechanical department, engineering procedures and project management functions.
- Project focus: educational, health care, commercial.

Dave Desjardins, P.E., LEED AP - Principal

- Responsible for electrical department engineering procedures and project management functions.
- Arc Flash department manager.
- Project focus: health care, institutional, and higher education.

Alison Staudinger, P.E., LEED AP BD+C - Partner

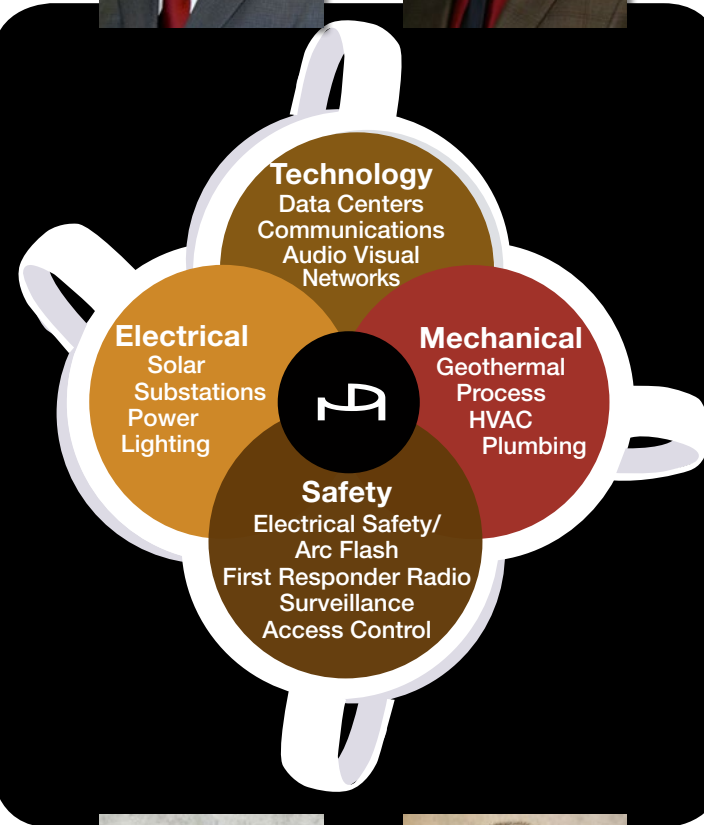

- Responsible for sustainable/LEED (Leadership in Energy and Environmental Design) initiatives in mechanical design efforts and building systems.
- Responsible for 3-dimensional BIM (Building Information Modeling) development.

- Project focus: K-12 and higher education, commercial, and health care facilities.

Andrew Juette, E.I., LEED AP - Partner

- Power distribution.
- Power generations systems.
- Project focus: health care, institutional, and industrial.

Jeff Stringham - Principal

- Responsible for mechanical department engineering procedures and project management functions with special focus on AutoCAD and specifications standards.
- Project focus: health care, light to medium industrial, commercial and educational facilities.

Steven Wheeler, RCDD - Partner

- Technology department manager, coordinating department engineering procedures and project management functions.
- First Responder Radio Testing and In-Building RF Amplification services.
- Oversees annual Tech Trends showcase.
- Project focus: audio visual, information technologies, security, communications, surveillance, and access control.

Roger DeBelly, P.E., RCDD - President

- Leads project management and improvement initiatives and marketing/business development.
- Coordinates project management functions.
- Project focus: mission critical (data centers), power generation, substation, and medium voltage systems.
